

PROSTATE+

Prostate+ is an ideal choice for individuals seeking comprehensive support for prostate health. Those experiencing symptoms of benign prostatic hyperplasia (BPH), such as urinary issues, may find relief through the carefully selected components like saw palmetto, flower pollen extract, stinging nettle, and cranberry extract. This daily supplement is tailored to maintain normal prostate function, reduce inflammation, and enhance urinary health.

Pine Phytosterols (Phytopin®)	L-Glycine, L-Glutamic Acid
Flower Pollen Extract (Graminex® G63)	L-Alanine
Cranberry Extract	Saw Palmetto Extract
	Nettle Leaf Extract

Stress

Prostate+ primarily targets prostate health, its potential benefits on stress may arise indirectly through its anti-inflammatory properties and support for overall well-being. By providing nutritional support for symptoms associated with conditions like benign prostatic hyperplasia (BPH), such as improved urinary function and reduced inflammation, individuals may experience a sense of physical comfort, potentially contributing to stress reduction. Additionally, the ingredients with antioxidant properties in Prostate+ may offer systemic support, further promoting a balanced and healthy response to stress.

Heart

Prostate+ may positively impact heart health through its inclusion of ingredients like cranberry extract, known for antioxidant properties that support cardiovascular well-being. The potential anti-inflammatory effects, particularly those associated with prostate health, could contribute to overall cardiovascular health. By addressing inflammation and providing antioxidant support, Prostate+ may indirectly contribute to a heart-healthy lifestyle, complementing other heart care.

* Daily Value not Established

Other Ingredients: Magnesium Stearate, Silicon Dioxide Micronized, RiBran 300

Energy

Prostate+ can potentially support energy levels through the inclusion of amino acids like L-Glycine, L-Glutamic Acid, and L-Alanine. These amino acids play vital roles in energy metabolism, contributing to the production and transportation of energy within cells. By promoting these processes, Prostate+ may indirectly aid in sustaining energy levels, offering individuals a comprehensive approach to prostate health while supporting overall vitality and well-being.
