**Methylation+** is a cutting-edge supplement that harnesses the power of methylated forms of vitamins B9 (Folate) and B12, along with Trimethylglycine (Betaine Anhydrous), to enhance the body's uptake and metabolism of these crucial B vitamins. Moreover, the formula is enriched with a patented form of PhosphatidylSerine, which facilitates the methylation process by identifying and eliminating dead, damaged, and toxic cells. This unique blend of vital nutrients is particularly essential for individuals with MTHFR genetic markers, as it ensures greater bioactivity, maximizes absorption, and optimizes cellular uptake.\*
