Nitrosigine®

Bonded Arginine Silicate

WHAT IS NITROSIGINE?

Nitrosigine® is a patented complex of Bonded Arginine Silicate that is scientifically engineered to deliver benefits essential to peak sports performance. Nitrosigine is a powerful and safe non-stimulant ingredient that has been clinically studied for safety and efficacy in 30 studies. The use of Nitrosigine has been shown to promote nitric oxide (NO) production for improved blood flow¹, focus, and energy²

Nitrosigine, By The Numbers

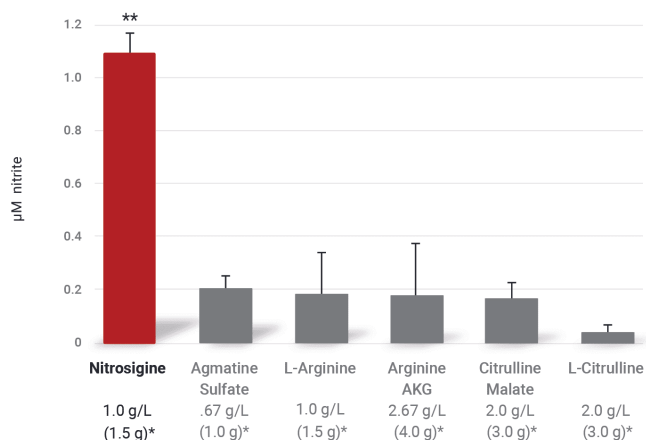

20 patents and pending applications worldwide

35 supporting research studies

Over 140 consumer brands

NITROSIGINE: SUPER NITRIC OXIDE BOOSTER

Nitrosigine vs. Other Ingredients: *In Vitro* Study

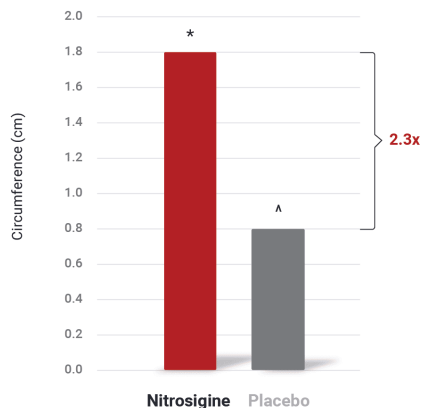

*relative clinical dose

**p<0.01 vs. other ingredients

NITROSIGINE SIGNIFICANTLY ENHANCED NITRIC OXIDE LEVELS COMPARED TO EACH OF THE OTHER COMPOUNDS TESTED (P<0.01) IN AN IN VITRO STUDY

NITROSIGINE BOOSTS MUSCLE PUMP

Increase in Upper Leg Pump After Workout - Day 4*

*p=0.001 vs. baseline; ^n.s. vs. baseline

NITROSIGINE INCREASED MUSCLE PUMP OVER BASELINE, WHILE PLACEBO DID NOT

¹Results compared to baseline

²Perceived energy measured by the validated Profile of Mood States (POMS) questionnaire
