Avoid exposure to excessive heat, light & moisture.

Contains tree nuts (from coconut water powder).

POSTWORKOUT

IDLife PostWorkout is an athletic grade, nutritional supplement that supports muscle repair and growth. It provides relief from symptoms of inflammation, soreness and fatigue after intense physical activity, so you can recover faster from your workouts and give your body the essential nutrients it needs.*

DIRECTIONS:

Mix one stick into 8-12 ounces of water or beverage of your choice within 45 minutes after completing your workout. May consume 1-2 times per day.

AVAILABLE FLAVORS:

- Raspberry Zest

BENEFITS:

- No Artificial Flavors or Sweeteners
- 500 mg Glutamine
- 1000 mg Creatine
- 1000 mg D-Ribose
- 2000 mg BCAAs

FAQs:

WHY ISN'T THERE PROTEIN IN POSTWORKOUT?

IDLife has already developed an extremely high quality protein shake. We designed a PostWorkout product that replenishes essential electrolytes and nutrients so the body can recover and repair itself. This allows people to choose their protein source after completing their workout.

CAN I USE POSTWORKOUT WITH OTHER IDLIFE PRODUCTS?

All IDLife products are designed to be consumed together.

WHY DID IDLIFE DEVELOP POSTWORKOUT?

IDLife identifies products that people already use that can be improved in quality and safety. PostWorkout was created to provide people with an excellent option that does not contain the unnecessary ingredients found in other products.

Maltodextrin, Natural Flavors, Citric Acid, Malic Acid, Stevia Leaf Extract, Beet Powder, Silicon Dioxide.

Manufactured in a facility that processes egg, wheat, milk, soy, tree nut, peanut, fish & shellfish products.

WARNING: Contains tree nuts from coconut water powder.

THE SCIENCE OF WORKOUT PRODUCTS: PROBLEM & SOLUTION

Physical activity is a critical part of leading a healthy lifestyle. Many people choose to take their workout to the next level by supplementing with a preworkout and postworkout formula. The sports nutrition category has grown exponentially over recent years to keep up with this desire.

THE PROBLEM:

- Most workout formulas on the market today are designed to give the user a euphoric rush or burst of energy in an effort to give the impression that the substance is providing the user a benefit. Unfortunately, many of these products are providing a short-term result while compromising the long-term health of the user.
- Most preworkout formulas on the market are laced with large amounts of ingredients designed to do little more than increase heart rate and blood flow so the user “feels” it working. Many use cheap artificial ingredients, flavors and sweeteners that provide little nutritional value.
- During intense physical activity, tissues get damaged at the micro-level and, if left unattended, could lead to an increased risk of injury, muscle loss and fatigue. Without proper postworkout nutrition, the body exhibits symptoms of physiological stress that can include muscle atrophy, delayed onset muscle soreness (DOMS), edema (swelling), inflammation and fatigue.

THE SOLUTION:

- IDLife PreWorkout is packed with a premium blend of targeted amino acids, branched-chain amino acids (BCAAs), vitamins, minerals, enzymes and nutrients that help maximize your results and give you the mental focus you need without any unnecessary fillers or additives that could actually hinder your workout.*
- IDLife PostWorkout is an athletic grade, nutritional supplement that supports muscle repair and growth and provides relief from symptoms of soreness and fatigue after intense physical activity. This allows you to recover faster from your workouts and give your body the essential nutrients it needs.*
- When these products are taken together you have the perfect combination of nutritional supplements to maximize your workouts, support muscle growth and restoration, and break through those dreaded plateaus.*

“I’ve been using the Pre and Post workouts for 2-3 weeks. This is the first time I’ve been able to swim a mile straight in 20 years. I’ve been lifting heavier than I’ve been lifting in years.” —Tony G.
