BENEFITS:

- Boost Free Testosterone*
- Enhance Libido*
- Improve Physical Performance*

FAQs:

WHAT IS THE EURYCOMA LONGIFOLIA ROOT (LJ100®) INGREDIENT IN IDLIFE VITALITY?

LJ100® is a patented ingredient that has been scientifically shown to help boost free testosterone levels, and enhance libido, sexual function, and overall physical performance. You can find more detailed information about the ingredient at www.LJ100.com.

IS THIS PRODUCT SAFE FOR SOMEONE WITH A HEART CONDITION?

You should consult your doctor before beginning any nutritional supplementation program.

HOW DOES IDLIFE VITALITY WORK?

Unlike some products that promise immediate results, Vitality is designed to help the body restore healthy levels of testosterone and cortisol, increase blood flow, support a natural sexual function and enhance libido. This maintenance product is not designed to be a quick fix, but a long-term nutritional strategy to help support the body's natural rhythms and patterns.

HOW DOES THIS SUPPLEMENT COMPARE TO THE "LITTLE BLUE PILL" I'VE HEARD ABOUT?

It doesn't. The "little blue pill" is a pharmaceutical drug designed to provide a fast-acting temporary solution to a long-term problem. Vitality is intended to be a long-term nutritional maintenance supplement to help support the body's natural rhythms and patterns. IDLife Vitality should not be compared with or correlated to drugs like the "little blue pill."

WHAT ARE THE DOSAGE RECOMMENDATIONS FOR VITALITY?

The product is designed to take one pill in the morning and one pill in the evening with food.

WHAT ARE THE BENEFITS OF INCREASED TESTOSTERONE?

As men age, their testosterone levels decrease, resulting in lower libido, sex drive, lean muscle mass, and overall energy levels. By increasing the body's natural production of free testosterone, you should see an improvement in all of these areas.

CAN WOMEN TAKE VITALITY?

Yes, however it is in a different dosing than for men. Vitality is a testosterone booster, and like men that suffer from the condition, women that have low testosterone can also get support from the benefits provided by Vitality. That said, in studies done prior to launch only about 40 percent of women saw a direct benefit.

*Consult your physician and follow all safety instructions before using any supplement or nutritional product.

performance!

THE SCIENCE OF VITALITY: PROBLEM & SOLUTION

The numbers are in, and they're alarming. More than 50% of men over 40 regularly experience Erectile Dysfunction, and an alarming number of men younger than 40 are prematurely experiencing low testosterone levels. Beyond the fact that only 15-30% of these men are currently seeking any help or support for their condition, more than 20% of relationship break-ups are directly linked to this condition. IDLife's Vitality was created to help boost free testosterone levels, and enhance libido, sexual function, and overall physical performance. We might all have to age, but nothing says we have to feel our age!

THE PROBLEM:

- 1 in 4 men over the age of 30 are dealing with low testosterone levels and the resulting effects that come along with it.
- More than 50% of men over the age of 40 are dealing with erectile dysfunction issues.
- More than 75% of American men are dealing with a combination of obesity, heart disease, diabetes, and hormone irregularities, contributing to low libido, reduced sexual function and an overall lull in physical performance.
- Low testosterone levels in men are responsible for increased fat mass, loss of muscle mass, lack of energy, low libido, loss of sex drive, and erectile dysfunction.

THE SOLUTION:

- Through a carefully formulated combination of high-quality nutritional ingredients, Vitality helps the body release free testosterone, increase blood flow, improve libido, and enhance overall sexual function.
- By helping boost your available free testosterone levels, Vitality helps decrease fat mass and increase muscle size and strength.
- Beyond the obvious benefits of Vitality, the patented ingredient LJ100® has also been scientifically shown to improve physical and mental energy, boost sports performance, reduce fatigue and improve the overall quality of sleep.

“The best thing about this product is that it actually focuses on the long-term solution.”
